

The June 5, 2009 Water Resources Conservation Advisory Council Meeting was held in the Annex of the Drummond Island Resort and Conference Center

The Water Resources Conservation Advisory Council Members and Guests had to take a ten minute ferry ride to get to the meeting.

You don't have to be on Drummond Island to enjoy these views of nature. Michigan has some 11,000 lakes and ponds and over 36,000 miles of river and streams with more freshwater coastline than any other state in the country. The deer population is around 1.6 million living in all 83 Michigan counties. This gives Michigan a deer / human population of 1 to 1. So go out and find your deer!
